

AIRTRAK-EA75
Eaves Ventilator with 75mm downstand
Supplied by Nicholson
Tel 0845 0098 980
Web www.nicholsonsts.com

Material
0.7mm stainless steel, vinyl coated GRP insect mesh

Ventilation
25mm continuous air gap equivalent

Dimensions
OA girth 100mm, length 1000mm

Compatibility
For ventilating metal, membrane or liquid roof coverings

Installation
The EA75 is fitted into a 1mm x 25mm rebate on the leading edge of the roofing deck using non ferrous fixings. The ventilator can be mitred at corners and trimmed to length with a large pair of tin snips. The metal roof covering is dressed down the face of the ventilator and welted around the bottom edge to prevent wind uplift. Where the roof covering is code 6 lead sheet or above, the lead is trimmed flush with the bottom edge of the ventilator and restrained using the Airtrak CF Clipfast Clips. For membrane and liquid applied roof coverings, a suitable metal flashing material should be used to cover the ventilator welting around the lower edge and extend onto the roof to facilitate a lap joint in accordance with the manufacturers instructions.
